## SUMMARY

Ingénieur en développement issu de l'Université M'Hamed Bougara de Boumerdès, j'ai acquis une expérience dans la conception d'applications et l'optimisation de systèmes informatiques. Mon approche repose sur la recherche de solutions efficaces, la rigueur technique et l'amélioration continue. Je m'intéresse particulièrement aux technologies émergentes et à leur potentiel pour résoudre des problématiques concrètes.

## EXPERIENCE

### Full Stack Development Engineer

08/2025 - Present

Sonatrach ↗

Technologies and tools: Django, Python, Oracle, Apex,

### Founder & CEO Dziria

07/2025 - Present

Dzirya ↗

The first 100% Algerian marketplace for buying and selling computers, gaming PCs, smartphones and high-tech accessories.

### Full stack developer

07/2024 - Present

Itihad group ↗

- At Itihad Group, I was responsible for the maintenance and optimization of several websites, as well as the development and management of web scraping bots.
- I improved front-end performance through code refactoring, lazy loading, and asset optimization to deliver a smoother and faster user experience across devices.
- On the automation side, I maintained and optimized multiple custom scraping bots designed to extract data from various external platforms, ensuring high reliability and adaptability to changes in website structures.
- I also developed AMP (Accelerated Mobile Pages) to significantly reduce load times on mobile devices, which helped enhance SEO rankings and boost mobile traffic.
- Technologies & Tools: Laravel, Mysql, Agile methodology, Git, GitLab, HTML, CSS, PHP, JavaScript, Bootstrap, Project Management, Linux, Python, Amp, Flutter, Firebase.

### Full Stack Development Engineer

Sonatrach

### Full stack developer

01/2024 - 06/2024

Techitaway ↗

- Participation in the maintenance of existing projects such as "Gouny" and "Recordati", which are based in France, as well as other local projects.
- Handled various code-related issues, including bug fixing, performance optimization, and code quality improvement to ensure better project stability and scalability.
- Technologies & Tools: Laravel, PostgreSQL, SharePoint API, Agile methodology, Git, GitLab, HTML, CSS, PHP, JavaScript, Bootstrap, Project Management, Linux, Docker.

### Full stack developer

01/2023 - 07/2023

M'hamed Bougara Boumerdes university ↗

Developed the back-office of the Boumerdes Mobility application to manage and organize various types of data.

- Implemented an online mobility platform that allowed real-time tracking of international internship applications for teachers, administrative staff (ATS), and PhD students.

- Integrated a custom workflow system to streamline application review processes for managers, enabling them to accept or reject submissions with clearly stated reasons.
- Also added a real-time chat system and a friend suggestion feature tailored for teachers, enhancing collaboration and communication within the platform.
- Technologies used: Laravel, PHP, MySQL, JavaScript, HTML, CSS, Bootstrap, UIKit.

EDUCATION

<b>Information Technology</b> University of Boumerdes, Algeria - Master's degree	10/2021 - 07/2023
• Module on functional programming, computer networking, security, and artificial intelligence.	
<b>Information Systems And Software Engineering</b> University of Boumerdes, Algeria - Bachelor's degree	09/2018 - 09/2021
• Coursework included object-oriented programming (OOP) and cybersecurity.	
<b>Baccalauréat (Mathematics)</b> Boukabous Ahmed High School, Boumerdes, Algeria	2015 - 2018

SKILLS

Nuxtjs	Tools & Platforms: Git, GitLab, Docker, Linux, Firebase, Flutter, AMP
Apex	AI & Computer Vision: OpenCV, YOLO
Django	Methodologies: Agile, Project Management
Languages: PHP, JavaScript, Python, Java, HTML, CSS	Soft Skills: Strong communication and teamwork, Research and analytical skills, Problem-solving and adaptability
Frameworks & Libraries: Laravel, React, Bootstrap, Tailwind CSS, UIKit	
Databases: MySQL, PostgreSQL, SQL
